

## Jonathan Whyte - Associate

Jon has over 30 years' experience in the construction industry, with 10 years in the UAE, focusing primarily on the commercial aspects of a project's development, including procurement, contracts management and contract administration.

His fields of expertise include cost estimating / planning, value engineering, risk management, procurement methodology and implementation, contract drafting, post-contract cost management, contract administration, settlement of final accounts and claims management.

He has a very broad range of experience across all sectors but particularly so on commercial, cultural, hotels and educational developments. Project experience ranges from grass roots on site quantity surveying to Client commercial management, thus enabling a thorough understanding of the various processes, strategies and team roles that need to be in place throughout the cycle of a project's development.

Jon's experience with a wide variety of different forms of contract such as FIDIC, JCT, GC Works, SBCC and various bespoke contract forms together with the various different types of procurement route enables him to assist in identifying the best solution to meet a Client's key objectives.
